

## Clean Version of Amendment to Specification

At page 5 after paragraph [0014] please insert the following new paragraph:

- An especially preferred first fuel will have a RON greater than 100, and a burn rate greater than 105% of iso octane at the high load end of the cycle and a laminar flame TC TTOO JAAL ROOM speed of greater than 105% of iso octane measured at a temperature and pressure representative of conditions in the engine at the high end of the load scale.

At page 15 please substitute the more easily read Table 3 below.

## TABLE 3
